METHODS OF DELIVERY

Our lessons are delivered **asynchronously** on the **Moodle Learning Platform** and require 110hrs MINIMUM, as mandated by the Ontario Ministry of Education. Each lesson typically takes one week to complete, and features lessons delivered on the learning platform, as well as a variety of assessments for, as, and of learning.

COURSE STRUCTURE

Courses usually run over 20 weeks, with the school year breaking down as follows:

- **Fall semester:** First week of September to late January, with a break between Christmas and New Year
- **Winter Semester:** First week of February to the end of June, with a break around Easter
- **Summer Semester:** the entire month of July

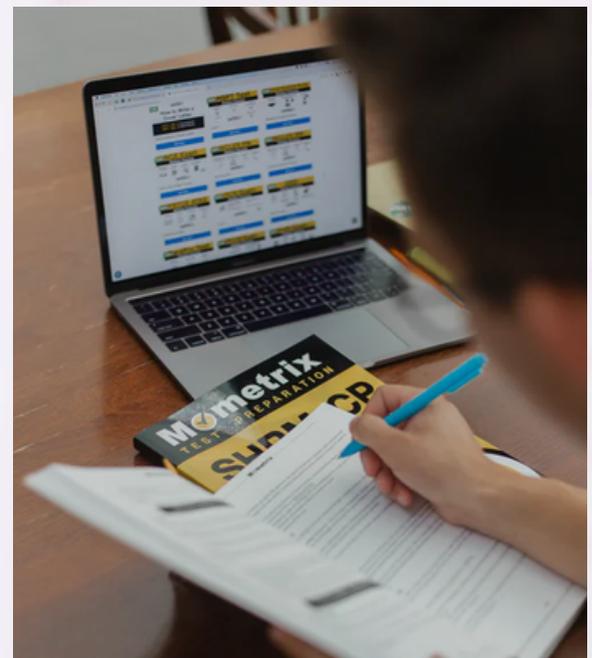

Lessons are delivered on a weekly basis on the learning platform Moodle, and bi-weekly teacher office hours are run off of Zoom, Microsoft Teams, Skype, WeChat, or any other platform that can facilitate face-to-face interaction. Between office hours, students can still communicate with their teacher by telephone, email, or using the built-in chat function on the Moodle App.

COURSE STRUCTURE

We do not have formal, final exams in any of our courses, so students do not have to worry about finding invigilated spaces to complete their exam; instead, all our courses are built on the inquiry model of learning, so they work on their course summative assessment throughout the semester.

STUDENT CENTERED

While, of course, we cannot guarantee specific grades in a course, students at The OOS have consistently graduated with marks in the 90ies, because of our small class sizes, capped at 15 students per class; and because every course comes with an Assessments Chart that differentiates between assessments that are For learning, As Learning, and For Learning; and **we centre lesson content around student interest**, so that they remain engaged, as our review [here](#) and [here](#) will attest to.

ONTARIOONLINE SCHOOLS

WE ARE A VERY NEW AND SMALL SCHOOL, WHICH GIVES US THE TYPE OF FLEXIBILITY THAT OTHER BIGGER SCHOOLS CANNOT.

Only Assessments Of Learning are graded, as per Growing Success, so students are able to know in advance, which assignments to focus on, in order to score the highest grade in a course.

Final grades in a course are reached through a triangulation of

- the product students submit (their assessments of learning)
- the teacher's observations of the student's engagement in the class material, and
- the conversations the teacher has with the student about the classwork
